

Export Services

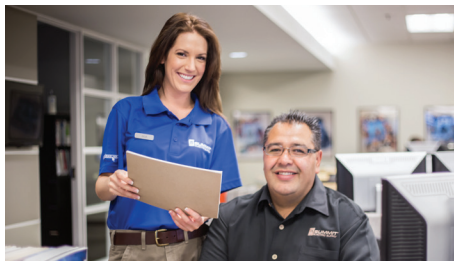

Convenient and reliable delivery, anywhere on earth.

Summit Electric Supply's International Sales Division, based in Houston, is a convenient one-stop center for international distribution of electrical equipment and supplies.

The division's experienced team of multi-lingual export professionals has an extensive knowledge of export laws and regulations, packaging and shipping procedures, and the preparation of customized letters of credit.

International services include Summit OnSite®, an inventory management capability that ensures stock items required for long-term projects are maintained on your job site, if necessary.

The International Sales Division works closely with the Engineering, Procurement and Construction Division, also based in Houston, that supplies EP&C projects internationally, as well as in the United States.

Summit has shipped product into 80+ countries.

In March 2007, Summit opened a sales office in Dubai, giving us a presence in a strategic trade port of the Middle East.
