# LED is a smart solution.

Switching to LED offers an immediate energy reduction along with many other long-term operational benefits.

## **LEDs have extremely low energy use and high quality light output.**

They also have a long life span without the ongoing maintenance requirements of traditional lighting, such as re-lamping or re-ballasting.

The benefits of LED over traditional commercial and industrial lighting are leading more and more companies to transition their facilities. In fact, by 2020, 70% of commercial and industrial companies will be using LED systems.

## **How your business can benefit from LEDs.**

LEDs have been on the market for more than a decade and technology is rapidly improving to make them even more energy efficient. The savings realized by LEDs continues to rise while the initial purchase investment is declining.

LEDs are now a cost-effective and sustainable solution, particularly in an environment where energy costs are growing. They offer tremendous flexibility and lighting control for your facility and provide

high quality, durable lighting that's suited for commercial and industrial applications, including manufacturing, warehousing, and production.

The energy savings you'll achieve from LED lighting will greatly outweigh any incremental price declines for LED fixtures, and Summit can customize an LED solution for your business that's both economical and functional. You'll save money without losing lighting quality that's critical to your business operations and employee safety.

**Many high quality LED fixtures have embedded controls that deliver required light levels at targeted surfaces and distribute light evenly.**

# Summit will help you and your customers save.

Beginning with a free energy audit, we'll help you and your customers by identifying inefficiencies throughout your facility.

**We'll also conduct site meetings to determine your exact needs, then provide a custom energy savings solution.**

Partnering with the world's leading manufacturers, we'll design the highest quality lighting and control system to meet your specific requirements.

You can start saving money and reduce your energy costs right now. We'll show you how.

The expertise of Summit's energy services team ensures your customized solution is the perfect match for your needs. Our team reliably provides exceptional customer service and offers turnkey project management services to keep your project running smoothly from start to finish.

To help you achieve maximum savings at your facility, we employ the most advanced systems and estimation tools.

We'll equip you with detailed information on your new lighting solution, including:

- Material and installation costs
- Energy and maintenance reduction calculations
- Utility rebates and inspection information

## Summit's Energy Services

-  Free audits
-  Lighting designs
-  Energy savings analysis
-  Rebates
-  Turnkey project management

Contact your Summit Account Manager today for more information.

**“Smart solid-state lighting in office buildings and industrial installations has the potential to reduce energy costs by 90%; however, achieving these costs takes more than just installing LED lighting.”**

**– Dean Freeman, Research Vice President at Gartner**

# Service and Solutions

## Superior Signature Counter Service

### 30-Second Counter Service Guarantee®

You're guaranteed service within 30 seconds or you'll get a Summit Buck® worth \$5 on your next purchase.

### 20/20 Will-Call Guarantee®.

Your phone or online order will be ready to pick up in 20 minutes or we'll credit \$20 to your account.\*

## Summit Solutions

Summit is the industry leader in helping you keep your projects on time and on budget.

### Summit Lockbox™

Eliminate extra steps with a pre-loaded Summit Lockbox™ delivered directly to your jobsite. It's your safe, secure, mobile solution for onsite storage

### Summit Snapstock™

Our cloud-based inventory management solution eliminates errors, reduces costs, and boosts employee efficiency.

### Summit OnSite®

Eliminate long lead times and avoid excess material costs with customizable mobile storage at your jobsite.

### Advanced Managed Project Services® (AMPS)

Building new industrial facilities involves many complex challenges. Supply shouldn't be one of them. Summit makes supply simple with Advanced Managed Project Services (AMPS®).

Designed for onsite materials management, AMPS® is a comprehensive menu of custom supply services for individual projects that ensures you get the greatest efficiency at the lowest overall cost. The program is effective at keeping inventory surplus and waste to a minimum on large industrial or commercial projects that require a supplier-managed inventory system.

*\*Cut product, backordered product, and COD accounts excluded.*

# Selection and Expertise

You need more than the right supplies at a good price. You need expertise. With almost 30 years of experience in the Phoenix market, Summit Solutions Specialists are your source for getting the job done right.

Our specialized service teams deliver exceptional service at every turn of your project. Our specialists can assist you with project management, lighting, switchgear, automation, and much more.

## Lighting Solutions

Our Energy Solutions Group can help improve your lighting quality to create a more functional, energy-efficient work space while cutting maintenance costs. Start with a free energy audit and cost/benefit analysis. This is a smart way to make sure you implement not only a good solution, but the right solution as well.

## Switchgear and Automation Solutions

Our automation and drive specialists can assist you with selection and sizing for small projects, up to and including full plant, complex control system installs and retrofits.

Summit is a true partner that will assist through your entire project from pre-design planning to implementation and post-sales support.

We look forward to working for you. Give us a call at (602) 267-1000 or get started at [summit.com](http://summit.com) today.
